

CASE STUDY: USER PERSONA

The Digital Native

Understanding the travel patterns and friction points of the modern student traveller in India's emerging tech hubs.

**Aarav Nair**

Student Traveller

Aarav is a university student who independently books flights several times a year, primarily when traveling between his hometown and university. He is comfortable with digital products but expects faster booking.

KEY BEHAVIORS

Budget-conscious

Mobile-first

Tech-savvy

Last-minute planner

Profile Overview

 LOCATION

Kochi, India

 OCCUPATION

University Student

 AGE GROUP

22 Years Old

 TRAVEL FREQUENCY

2-4 Flights/Year

"I just want an app that understands I'm on a budget but doesn't make the booking process feel like a chore."

Core Goals

**Affordability**

Find the lowest fares through student discounts and loyalty points.

**Speed**

Quick booking flow that doesn't require redundant data entry.

**Real-time Info**

Instant notifications for gate changes or flight delays.

Frustrations

**Hidden Fees**

Frustrated by unexpected convenience fees added at the final checkout stage.

**Complex Navigation**

Difficulty finding the 'Student Fare' section in standard airline apps.

**Manual Check-in**

Dislikes the friction of manual web check-in processes.

EXPLORE DESIGN SOLUTIONS 

Priya Menon

Business Traveler • Bengaluru, India

Priya is a high-achieving Product Manager at a leading tech firm in Bengaluru. She travels bi-weekly for stakeholder meetings across Singapore and Dubai. For her, travel isn't a leisure activity—it's a transition between work environments.

KEY BEHAVIORS

- Efficiency-first mindset
- Prefers automated check-ins
- Values premium lounge access

PROFILE OVERVIEW

AGE 34

LOCATION Bengaluru, India

TRAVEL FREQUENCY Twice a Month

- iOS
- Slack
- Jira
- LinkedIn

"My travel schedule is demanding. I need a booking experience that respects my time and anticipates my professional needs."

PRIMARY GOALS

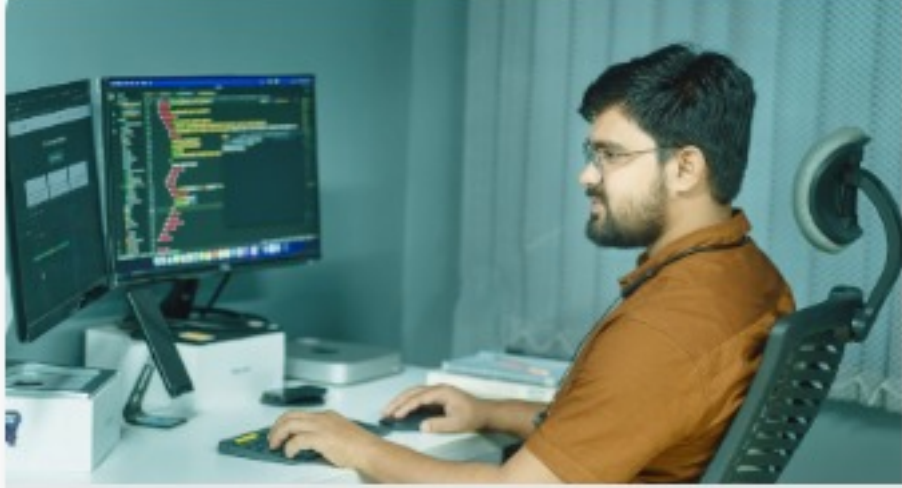

- ✓ Reduce the time spent on repetitive booking steps by at least 50%.
- ✓ Access reliable, high-speed Wi-Fi information for all flight legs.

FRICTIONS & PAIN POINTS

- ✗ Unclear policies regarding last-minute rescheduling for business class.
- ✗ Fragmented booking flows that don't save preferred meal or seat options.
- ✗ Lack of real-time updates for gate changes during tight connections.

WORK MODE
Always-On

Rajesh Kumar

Family Traveler

Rajesh is a detail-oriented tech professional who travels primarily for family vacations. He values predictability, safety, and comfort, seeking seamless digital tools that manage the complexities of traveling with young children.

KEY BEHAVIORS

Predictability seeker

Plan-ahead traveler

Safety conscious

"When I travel with my family, the app should be the least of my worries. I need absolute clarity and reliability."

USER PROFILE

OCCUPATION

Senior Software Engineer

LOCATION

Chennai, India

FAMILY STATUS

Married, 2 Children (Age 6 & 9)

TRAVEL FREQUENCY

Once a year

PRIMARY GOALS

Secure direct flights to minimize transit stress for children.

Easily manage multiple boarding passes and seat selections.

Access real-time gate and baggage information on-the-go.

KEY PAIN POINTS

Inconsistent mobile apps that crash during critical check-in steps.

Hidden fees that appear late in the booking workflow.

Lack of clear communication during flight delays or gate changes.
